

**RESEARCH ABSTRACTS FROM
THE RUMINANT NUTRITION & MICROBIOLOGY LABORATORY –
UNIVERSITY OF DELAWARE
(Last 10 years only) 1998 -Current**

Klingerman, C. M., E. E. McDonell, W. Hu, M. C. Der Bedrosian, and L. Kung, Jr. 2008. Exogenous amylase enzymes for lactating dairy cows. *J. Dairy Sci.* 91, E-Suppl. 1:262.

Reich, L. J., M. W. Hofherr, R. J. Schmidt, W. Hu, and L. Kung, Jr. 2008. The effect of combining *Lactobacillus buchneri* 40788 with lactic acid bacteria on the fermentation, microbial populations and aerobic stability of brown midrib corn silage. *J. Dairy Sci.* 91, E-Suppl. 1:32.

Hu, W., R.J. Schmidt, E.E. McDonell, C.M. Klingerman, L. Kung, Jr. 2008. The effect of *Lactobacillus buchneri* 40788 or *Lactobacillus plantarum* MTD-1 on the fermentation and aerobic stability of corn silages ensiled at two dry matter contents. *J. Dairy Sci.* 91, E-Suppl. 1:31.

Mari, L. J., R. J. Schmidt, L. G. Nussio, C. M. Hallada, and L. Kung, Jr. 2008. An evaluation of the effectiveness of *Lactobacillus buchneri* 40788 to improve the aerobic stability of corn silage in farm silos. *J. Dairy Sci.* 91, E-Suppl. 1:31.

Hofherr, M. W., L. J. Reich, M. C. Der Bedrosian, M. C. Santos, W. Hu, and L. Kung, Jr. 2008. Effect of a microbial inoculant producing ferulic acid esterase on the fermentation and ndf digestibility of normal and BMR corn silages. *J. Dairy Sci.* 91, E-Suppl. 1:32.

Hu, W., M. E. Persia, and L. Kung, Jr. 2008. Influence of an α -amylase on in vitro ruminal fermentation and starch degradation. *J. Dairy Sci.* 91, E-Suppl. 1:269.

Kung, Jr., L. 2008. Fermentation – Beyond the basics. Dairy Extension Symposium – Focus on Forages. Midwest Animal Science. Mtgs *J. Anim. Sci.* 86(e-Suppl. 3):22.

Kung, Jr., L. 2008. Sulfur metabolism in the rumen. Sulfur in ruminant diets symposium. Midwest Anim. Sci. Mtgs. *J. Anim. Sci.* 86(e-Suppl. 3):21.

Kung, Jr., L., E. C. Stough, E. E. McDonell, R. J. Schmidt, M. W. Hofherr, L. J. Reich, and C. M. Klingerman. 2007. The effect of wide swathing on wilting times and nutritive value of alfalfa haylage. *J. Dairy Sci.* 90(Suppl. 1):38.

Schmidt, R. J., J. A. Mills, W. Hu, C. M. Klingerman, E. E. McDonell, and L. Kung, Jr. 2007. Changes in fermentation end products and the use of real-time quantitative PCR to

monitor the dynamics of *Lactobacillus buchneri* in alfalfa silage. *J. Dairy Sci.* 90(Suppl. 1):345.

Klingerman, C. M., R. J. Schmidt, W. Hu, E. E. McDonell, and L. Kung Jr. 2007. The effect of microbial inoculants on the fermentation and aerobic stability of orchard grass silage. *J. Dairy Sci.* 90(Suppl. 1):179.

McDonell, E. E., C. M. Klingerman, R. J. Schmidt, W. Hu, and L. Kung, Jr. 2007. An evaluation of two methods to cover bunker silos to maintain the nutritive value of silage. *J. Dairy Sci.* 90(Suppl. 1):180.

Schmidt, R. J., W. Hu, C. M. Klingerman, E. E. McDonell, and L. Kung, Jr. 2007. The effect of *Lactobacillus buchneri* 40788 with or without *Pediococcus pentosaceus* on the fermentation and aerobic stability of corn silage made at different locations. *J. Dairy Sci.* 90(Suppl. 1):181.

Hu, W., and L. Kung, Jr. 2007. Dietary Na:K ratio effect on milk performance and mineral metabolisms in mid-lactation cows during summer. *J. Dairy Sci.* 90(Suppl. 1):406.

Hu, W., L. Kung, Jr. and M. R. Murphy 2006. The relationship between dry matter intake and acid-base status of lactating dairy cows as manipulated by dietary cation-anion difference. *J. Dairy Sci.* 89(Suppl. 1): 443.

Mulrooney, C. N. W. Hu, and L. Kung, Jr. 2006. High temperatures have detrimental effects on the stability of silage inoculants that have been rehydrated in water. *J. Dairy Sci.* 89(Suppl. 1): 191.

Schmidt, R. J., P. G. Summer and L. Kung, Jr. 2006. An evaluation of various nitrogenous additives or a microbial inoculant on the fermentation and aerobic stability of corn silage. *J. Dairy Sci.* 89(Suppl. 1): 193.

Schmidt, R. J., S. Kim, M. G. Emara and L. Kung, Jr. 2006. Polymerase chain reaction for identification and quantification of *Lactobacillus buchneri* in silage. *Dairy Sci.* 89(Suppl. 1): 191.

Moulder, B. M., L. Kung, Jr., R. S. Teller, C. N. Mulrooney and R. J. Schmidt. 2006. The nutritive value of normal- or high-cut normal corn silage versus normal-cut BMR corn silage for lactating dairy cows. *J. Dairy Sci.* 89(Suppl. 1): 193.

Kung, L., Jr. and R. E. Muck. 2006. Preservation of protein during harvest and storage. *J. Dairy Sci.* 89(Suppl. 1):449.

Teller, R. S., R. Schmidt, C. Mulrooney, B. Moulder, J. St. Amand, and L. Kung, Jr. 2005. The effect of a fibrolytic enzyme mixture on the performance of lactating dairy cows and digestibility of the total mixed ration. *J. Dairy Sci.* 88(Suppl. 1):307.

Teller, R. S., R. J. Schmidt, B. M. Moulder, C. N. Mulrooney, V. R. Veenema, and L. Kung, Jr. 2005. The effects of damaging ears of corn in the field and the use of potassium sorbate on the fermentation, aerobic stability, and production of mycotoxins in corn silage. *J. Dairy Sci.* 88(Suppl. 1):99.

Schmidt, R. J., D. H. Kleinschmit, R. S. Teller, L. Kung, Jr. 2005. The effect of silage additives and delayed filling on the fermentation of ryegrass silage. *J. Dairy Sci.* 88(Suppl. 1):185.

R. J. Schmidt, D. H. Kleinschmit, J. M. Ladd, J. E. Lynch, and L. Kung Jr. 2004. The effect of essential plant oils on milk production and composition from lactating dairy cows and on silage fermentation and aerobic stability of corn silage. *J. Dairy Sci.* 87(Suppl. 1):129.

Teller, R. S., R. J. Schmidt, and L. Kung, Jr. 2004. The effects of *Lactobacillus buchneri* 40788 and damage to the corn ear on the fermentation, aerobic stability, and production of mycotoxins in corn silage. *J. Dairy Sci.* 87(Suppl. 1): 129.

Antoniali, M., O.C.M. Queiroz, R. J. Schmidt, and L. Kung, Jr. 2004. The effect of an inoculant containing *Lactobacillus buchneri* 40788 on fermentation and aerobic stability of corn silage at two packing densities. *J. Dairy Sci.* 87(Suppl. 1):47.

Lynch, M. P., J. M. Neylon, T. L. Ebling, D. H. Kleinschmit, J. G. Carr, K. E. Stratton, M. Reddish, J. M. Ladd, J. E. Lynch and L. Kung Jr. 2003. The effect of *Lactobacillus buchneri* 40788 on the fermentation alfalfa silage ensiled for an extended period of time. *J. Dairy Sci.* 85: (Suppl. 1):230.

Kleinschmit, D. H., R. J. Schmidt, J. E. Lynch, J. M. Ladd, K. E. Stratton, J. G. Carr, M. Reddish, and L. Kung Jr. 2003. The effect of *Lactobacillus buchneri* 40788 and *Pediococcus pentosaceus* on the fermentation and aerobic stability of corn silage. *J. Dairy Sci.* 85: (Suppl. 1):231.

Kleinschmit, D. H., R. J. Schmidt, J. E. Lynch, and L. Kung, Jr. 2003. A comparison of the effects of microbial inoculants designed to improve the aerobic stability of corn silage. *J. Dairy Sci.* 85: (Suppl. 1):11.

Kleinschmit D. H. and L. Kung, Jr. 2003. A summary of the effect of *Lactobacillus buchneri* on the fermentation and aerobic stability of silage. *J. Dairy Sci.* 85: (Suppl. 1):231.

Kung, Jr., L., D. E. Putnam and J. E. Garrett. 2003. Comparison of commercially available rumen-stable choline products. *J. Dairy Sci.* 85: (Suppl. 1):275.

Neylon, J. M., T. L. Ebling, C.C. Taylor, M. P. Lynch, M. A. Reddish, M. I. Endres, and L. Kung, Jr. 2002. The effects of height of cutting, hybrid, and stage of maturity at harvest on the nutritive value of corn silage for lactating dairy cows. *J. Dairy Sci.* 85: (Suppl. 1):383.

T. L. Ebling, J. M. Neylon, C. C. Taylor, M. A. Reddish, M. P. Lynch and L. Kung Jr. 2002. The effect of adding *Lactobacillus buchneri* 40788 (LB), enzymes (ENZ), or ENZ and LB on the fermentation and aerobic stability of high moisture corn in lab silos. *J. Dairy Sci.* 85: (Suppl. 1): 383.

Kleinschmit, D. H., J. M. Neylon, T. L. Ebling, J. M. Ladd, J. E. Lynch and L. Kung, Jr. 2002. A comparison of chemical and microbial anti-fungal additives and their effects on the fermentation and aerobic stability of corn silage. *J. Dairy Sci.* 85: (Suppl. 1):24.

Ebling, T. L., J. M. Neylon, D. H. Kleinschmit, J. M. Ladd, C. C. Taylor and L. Kung Jr. 2002. Comparison of physical and chemical characteristics of mechanically processed brown midrib, unprocessed brown midrib, or processed normal corn silage. *J. Dairy Sci.* 85: (Suppl. 1): 383.

Ebling, T. L., J. M. Neylon, D. H. Kleinschmit, J. M. Ladd, C. C. Taylor and L. Kung Jr. 2002. Effect of feeding mechanically processed brown midrib (PBMR), unprocessed brown midrib (UBMR), or processed normal corn silage (P7511) in diets for dairy cows on DM intake, milk production and digestion. *J. Dairy Sci.* 85: (Suppl. 1):383.

Ebling, T., J. M. Neylon, C. C. Taylor, and L. Kung, Jr. 2001. Effect of a chemical antifungal mixture, enzymes, *Lactobacillus buchneri* (LB) or enzymes and LB on the fermentation and aerobic stability of high moisture corn. Proc. Grad. Student Res. Symp. Univ. of Delaware.

Taylor, C. C., M. P. Lynch, J. M. Neylon, T. L. Ebling, and L. Kung, Jr. 2001. Adding *Lactobacillus buchneri* 40788 to alfalfa silage increases the production of acetic acid in laboratory and farm-scale silos and has no effect on the dry matter intake of high producing dairy cows. *J. Dairy Sci.* 84(Suppl. 1):155.

Taylor, C. C., J. A. Mills, J. M. Neylon, and L. Kung, Jr. 2001. The effect of *Lactobacillus buchneri* 40788 and enzymes on the fermentation and aerobic stability of barley silage fed to lactating cows. *J. Dairy Sci.* 84(Suppl. 1):154.

Neylon, J. M., C. L. Myers, and L. Kung, Jr. 2001. The effect of applying a buffered propionic acid-based preservative (Ki 112) alone or in combination with a mixture of

homolactic acid bacteria (HAB) on the fermentation and aerobic stability of high moisture corn. J. Dairy Sci. 84(Suppl. 1):156.

Lynch, M. P., J. A. Lazartic, J. M. Neylon, C. C. Taylor, M. A. Reddish, and L. Kung, Jr. 2001. The effect of inoculation with *Lactobacillus plantarum* MTD1 and packing density on the fermentation of high DM alfalfa silage. J. Dairy Sci. 84(Suppl. 1):155.

Taylor, C. C., J. M. Neylon, J. A. Lazartic, J. A. Mills, R. M. Tetreault, A. G. Whiter, R. Charley, and L. Kung, Jr. 2000. *Lactobacillus buchneri* and enzymes improves the aerobic stability of high moisture corn. J. Dairy Sci. 83(Suppl. 1): 111.

Kung, L., Jr., J. Lazartic, R. L. Wuerfel, L. M. Rode, K. A. Beauchemin, and R. J. Treacher. 2000. The effect of various combinations of fibrolytic enzymes on the feeding value of a TMR fed to lactating cows. J. Dairy Sci. 83(Suppl. 1): 297.

Mills, J. A., A. G. Whiter, C. L. Myers, and L. Kung, Jr. 2000. The effect of delayed filling and application of a buffered propionic acid-based additive on the fermentation of barley silage. J. Dairy Sci. 83(Suppl. 1): 111.

Neylon, J. M., L. Kung, Jr., C. L. Myers, N. K. Ranjit, and J. M. Robinson. 2000. The effect of varying doses of a buffered propionic acid-based preservative on the fermentation and aerobic stability of barley silage. J. Dairy Sci. 83(Suppl. 1): 111.

Ranjit, N. K., J. R. Robinson, K. K. Kreikemeier, and L. Kung, Jr. 1999. *Lactobacillus buchneri* markedly improves the fermentation and aerobic stability of corn silage. J. Dairy Sci. 82(Suppl. 1): 123.

Whiter, A. G., L. Kung, Jr., N. K. Ranjit, J. Y. Tavares, and J. R. Robinson. 1999. The interactions between silage dry matters and forms of bacterial inoculants. J. Dairy Sci. 82(Suppl. 1): 125.

Kung, L., Jr., N. K. Ranjit, J. R. Robinson, and R. C. Charley. 1999. The effect of *Lactobacillus buchneri* on the fermentation and aerobic stability of barley silage. In: The Proceedings of the XIIth International Silage Conference, Uppsala, Sweden. PP 272-273.

Ranjit, N. K., L. Kung, Jr., J. R. Robinson, and K. K. Kreikemeier. 1999. Inoculation with *Lactobacillus buchneri* increases the acetate and propionate content of barley silage resulting in improved aerobic stability. J. Anim. Sci. 77(Suppl. 1): 253.

Robinson, J. M., L. Kung, Jr., N. K. Ranjit, and J. Y. Tavares. 1999. The effect of various levels of ammonia or a buffered propionic acid-based preservative on the fermentation and aerobic stability of corn silage. J. Anim. Sci. 77(Suppl. 1): 211.

Ranjit, N.K., M. A. Cohen, R. C. Smoot, J. Y. Tavares, and L. Kung, Jr. 1998. The effects of *Lactobacillus plantarum* (LP), *L. buchneri* (LB) and a propionic acid-based preservative on the fermentation and aerobic stability of corn silage and the aerobic stability of a TMR. J. Dairy Sci. 81(Suppl. 1):196.

Kung, L., Jr., R. J. Treacher, and M. A. Cohen. 1998. Enzyme-treated forages for lactating cows. J. Dairy Sci. 81(Suppl. 1):196.
