

**The Ruminant Biology Laboratory  
University of Delaware  
Fall 2007**

Mary, Sharon, Sarah, Laura

**Current Research Group:**

**Sarah Nebzydoski** (B.S., University of Scranton, M.S. candidate) started her program in August 2007. She will be examining circadian patterns of clock gene expression in bovine neutrophils.

**Laura Nemec** (B.S., Juniata College, M.S. candidate) started her program in August 2007. She will determine whether bovine neutrophils undergo circadian patterns of functionality.

**Sharon Pozzo** (undergraduate researcher) started in the lab as a McNair Scholar in May 2007. She is currently a Senior Thesis Candidate studying in vivo and in vitro clock gene expression in bovine lymphocytes.

**Mary Rankin** (undergraduate researcher) started in the lab in May 2007. She set everything up in the new lab and is studying in vivo and in vitro clock gene expression in bovine lymphocytes.
