[**Demir, E.** 2008. The Fulgoromorpha and Cicadomorpha of Turkey. Part I: Mediterranean region (Hemiptera). *Munis Entomology & Zoology* 3 (1): 447-522]

ABSTRACT: The paper gives faunistical review of the Fulgoromorpha and Cicadomorpha of Mediterranean Region in Turkey.

KEY WORDS: Fulgoromorpha and Cicadomorpha, Fauna, Mediterranean Region, Turkey.

INTRODUCTION

The first faunistic records were given by Fahringer (1922), Haupt (1930), Kerville (1939), Zachvatkin (1937, 1946) and Linnavuori (1965). The first comprehensive study on Turkish Auchenorrhyncha was carried out by Dlabola who is a Czech scientist, in 1957. Dlabola described many new species from Turkey and gave numerous faunistic records for Turkey in this work and his other works (1957, 1971a, 1971b, 1974a, 1974b, 1977, 1979a, 1979b, 1980, 1981, 1982, 1983a, 1983b, 1984, 1985a, 1985b, 1986, 1987, 1989, 1994). On the other side, Asche (1982), Remane & Hoch (1985) also gave many records from Turkey in their works. On this subject, Kalkandelen also published many papers (1972, 1974, 1980, 1985, 1987, 1988, 1989a, 1989b, 1990, 1993, 1994, 2000). Then, Lodos & Kalkandelen prepared a faunistic list of Turkish Auchenorrhyncha species and they published into a series comprising of 27 articles (1980 – 1988). According to this work, 725 Auchenorrhyncha species were present in Turkey. Kartal (1980, 1981, 1983, 1985, 1986, 1987, 1988) and then Zeybekoğlu and his team (1992, 1994a, 1994b, 1994c, 1997, 1998, 2000, 2001), Güçlü (1996, 1997), Başpınar & Uygun (1991a, 1991b, 1991c, 1992a, 1992b), Meyer-Arndt (1988, 1991), Boulard (1979, 1993) Emeljanov (2003), Gnezdilov (2002) ve Demir (1998, 2004a, 2004b, 2005a, 2005b, 2006a, 2006b, Demir, 2006c, 2006d, Demir, 2007a, 2007b) gave many Auchenorrhyncha records for Turkey and described some new species from Turkey.

Although the suborders Fulgoromorpha and Cicadomorpha are very rich groups, it has not completely been determined yet, how many species are present in Turkey. Works carried out in Turkey until now are incomprehensive and only related to some regions of Turkey. For this reason, these studies do not include sufficient faunistic records for many regions of Turkey. Consequently, these regions have not been studied fully enough yet. To determine Turkish fauna entirely, many works should be carried out in local areas especially. As the first step of this, the present data must be compiled, so unstudied regions will appear.

With this study, the aim was to compile all existent records of the species of Fulgoromorpha and Cicadomorpha from Turkey. Hence, a series work is planned with the is aim to expose Turkish Fulgoromorpha and Cicadomorpha fauna as possible in detail and entirely beginning with the Mediterranean Region. This present study is an attempt at the first step of this aim.

Turkey is divided into seven regional parts commonly. These are;

Marmara Region (North-West Turkey)

A. European Turkey (=Thrace)

1. Ergene Part (including Edirne and Tekirdağ provinces)
2. Istanca Part (including Kırklareli province)
3. Çatalca Part (including İstanbul province)

B. Asian Turkey (=North-West Anatolia)

1. Kocaeli Part (including Kocaeli and Sakarya provinces)
2. South Marmara Part (including Bilecik, Yalova, Bursa, Balıkesir and Çanakkale provinces)

Aegean Region (West Turkey)

1. Aegean Part (including Manisa, İzmir, Aydın, Muğla and Denizli provinces)
2. Central-West Anatolia Part (including Kütahya, Uşak and Afyon provinces)

Mediterranean Region (South and Sout-West Anatolia)

1. Antalya Part [= Western Mediterranean] (including Burdur, Isparta and Antalya provinces)
2. Adana Part [=Eastern Mediterranean] (including İçel, Adana, Osmaniye, Hatay, Kahramanmaraş and Kilis)

Central Anatolian Region

1. Upper Sakarya Part (including Eskişehir and Ankara provinces)
2. Konya Part (including Konya, Aksaray and Karaman provinces)
3. Central Kızılırmak Part (including Çankırı, Kırıkkale, Yozgat, Kırşehir, Nevşehir, Niğde, Kayseri and Sivas provinces)

Black Sea Region (North Anatolia)

1. Western Black Sea Part (including Düzce, Bolu, Karabük, Zonguldak, Bartın, Kastamonu and Sinop provinces)

2. Central Black Sea Part (including Samsun, Çorum, Amasya, Tokat and Ordu provinces)
3. Eastern Black Sea Part (including Giresun, Trabzon, Gümüşhane, Bayburt, Rize and Artvin provinces)

Eastern Anatolian Region

1. Erzurum-Kars Part (including Ardahan, Kars, Erzurum and Iğdır provinces)
2. Upper Fırat Part (including Erzincan, Tunceli, Elazığ, Malatya, Bingöl and Bitlis provinces)
3. Upper Murat-Van Part (including Ağrı, Muş and Van provinces)
4. Hakkari Part (including Şırnak and Hakkari provinces)

South-Eastern Anatolian Region

1. Central Fırat Part (including Gaziantep, Adıyaman and Şanlıurfa provinces)
2. Dicle Part (including Diyarbakır, Mardin, Batman and Siirt provinces)

ARRANGEMENT OF INFORMATION

Information in the present text is given in the following order:

The high taxa names are given simply.

For the genus names, the synonyms are provided under the taxon names.

For each species, the synonyms are provided under the taxon names.

The data, **Distribution, Distribution in Turkey** under the title for each taxon is given.

Distribution. In these parts, the whole distribution areas in the world are provided for each taxon.

Distribution in Turkey. On the first line (in paranthesis) abbreviations of the provinces in Turkey are given. These parts include previous records that have been given by various authors in different literatures. The whole records are evaluated as only the concerning province and locality in the related reference. Each record is accompanied by the author's name and publication date of the related reference.

Abbreviations of the provinces in Turkey

01: Adana	02: Adıyaman	03: Afyon
04: Ağrı	05: Amasya	06: Ankara
07: Antalya	08: Artvin	09: Aydın
10: Balıkesir	11: Bilecik	12: Bingöl
