

## Rhode Island sites, 2010

Lisa Tewksbury  
University of Rhode Island

## Rhode Island MAM

- Both locations, a lot of dodder starting in June
- Definitely parasitic on the mile-a-minute
- Saw flowers
- Definitely saw insertion
- By Sept. both releases sites had dead patches of MAM where there had been dodder

DOT Cranston site, dodder in June

DOT Cranston site in Sept., damage from dodder

Brookdale, Cranston site in Sept.  
dodder damage to MAM

Brookdale, Cranston site in Sept.  
dodder damage to MAM
