7/15 -7/16	1	65	7-days	508
7/17- 7/20	0	65	10-days	526
7/20- 7/21	1	66	10- days	530
7/22- 7/24	0	66	10-days	540
7/25-7/26	2	68	10-days	552
7/26- 7/28	0	68	10-days	565

There have been no new reports of late blight in the region since last week when we reported that late blight was found in a potato field north of Bridgeton, NJ.

If you still have green foliage maintain fungicide applications.

For specific fungicide recommendations, see the 2010 Delaware Commercial Vegetable Production Recommendations Book
