

## First-Semester Schedule for Engineering Technology majors

You may find that you are already registered in several of these courses. That was done to ensure you got a seat in courses needed for the major. Do not drop any course in which you are already registered, unless you speak to an advisor first.

- EGTE 165                      New Student Seminar (0 cr.)
- EGTE 115                      Intro to Computer Problem Solving (4 cr.)
- MATH 010, 117 or 241 (3-4 cr.)\*
- CHEM 103                      General Chemistry (4 cr.)^
- Social Sciences/Humanities Course (3 cr.)

\*Math course depends on placement. If you placed in Level I, II, or III on the Math Placement Test, you are strongly encouraged to take MATH 010 in the Fall term. Although this is a non-credit course, it is the proper preparation to ensure you are ready to continue in your math sequence. Although it does not count toward graduation, the credits (3) are counted toward your full-time load in the semester. If you choose to enter a higher level of MATH, you do so at your own risk.

^ If you enroll in MATH 010 in the Fall term, you should not take CHEM 103, but choose an additional Social Science/Humanities course in its place. You should note that you will likely need to take MATH 117 and CHEM 103 in the Winter and/or Spring terms in order to be ready for the additional Chemistry and Math courses in the major.
