First-Semester Schedule for

Landscape Horticulture majors

- This major has changed to "Landscape Horticulture and Design." It has two concentrations available to new students---Landscape Horticulture and Public Horticulture. For more information, visit http://ag.udel.edu/plsc/lsDesign/index.html. All new students will be converted to the new major and concentrations at DelaWorld 101. The first-term schedule is the same for all concentrations.

You may find that you are already registered in several of these courses. That was done to ensure you got a seat in courses needed for the major. Do not drop any course in which you are already registered, unless you speak to an advisor first.

- PLSC 171 — New Student Colloquium (1 cr.)
- PLSC 101 — Botany I (4 cr.)
- MATH 010, 114, 115 or 221 — Math course based on level (3 cr.)*
- CHEM 101 or 103 — General Chemistry (4 cr.)^
- Choice of one course (3-4 cr.) from:
  - Social Sciences and Humanities course – See list below.
  - PLSC 103, Landscape and Field Sketching (4 cr.)

*Math course depends on placement. LH majors may take any 100 or 200 level math course to fulfill their degree requirements. If you placed in Level I on the Math Placement Test, you are strongly encouraged to take MATH 010 in the Fall term. Although this is a non-credit course, it is the proper preparation to ensure you are ready to continue in your math sequence. Although it does not count toward graduation, the credits (3) are counted toward your full-time load in the semester. If you choose to enter a higher level of MATH, you do so at your own risk. If you enroll in MATH 010 in the Fall term, you should take CHEM 101, not CHEM 103.

^ See UD Catalog and course descriptions for difference between CHEM 101 and 103 (link is below.)
