

## First-Semester Schedule for Wildlife Conservation majors

You may find that you are already registered in several of these courses. That was done to ensure you got a seat in courses needed for the major. Do not drop any course in which you are already registered, unless you speak to an advisor first.

- ENWC 165                                      New Student Seminar (1 cr.)
- ENWC 201                                      Wildlife Conservation and Ecology (3 cr.)
- MATH 010, 115 or 221                      Math course based on level (3 cr.)\*
- CHEM 101 or 103                            General Chemistry (4 cr.)^
- BISC 207                                        Intro Biology I (4 cr.)
  - Options if BISC 207 does not fit into schedule include:
    - FREC 150 Economics of Agriculture and Natural Resources (3 cr.)
    - FREC 135 Intro to Data Analysis (3 cr.)
    - Social Sciences and Humanities course (3 cr.) – See list below.

\*Math course depends on placement. If you placed in Level I on the Math Placement Test, you are strongly encouraged to take MATH 010 in the Fall term. Although this is a non-credit course, it is the proper preparation to ensure you are ready to continue in your math sequence. Although it does not count toward graduation, the credits (3) are counted toward your full-time load in the semester. If you choose to enter a higher level of MATH, you do so at your own risk. If you enroll in MATH 010 in the Fall term, you should take CHEM 101, not CHEM 103.

^ See UD Catalog and course descriptions for difference between CHEM 101 and 103 (link is below.)

### **For assistance with course selection and advisement, please contact:**
