	* Must earn C- or better in all courses.	Total:	18 credits

June 2008

***PLEASE NOTE:**

Because of the high demand on some ENWC courses required for Wildlife Conservation majors, the **department cannot guarantee that minors will be able to register for all desired courses needed to complete the Wildlife Conservation Minor.** WC and Natural Resources Management *majors* will have priority for spaces before minors.

Students also should note that some of ENWC courses have BISC 302 as a prerequisite, which we are not permitted to list as a requirement for the minor. Students who do not have that course may be at a distinct disadvantage in some upper level ENWC courses.
